

WORK EXPERIENCE PROGRAM

The Work Experience Seminar and Work Experience Transitional Seminar courses offer special support to students who may be experiencing significant personal, academic, financial or other difficulty. Students selected for the program participate in a Work Experience Seminar or Transitional Seminar (for one quarter credit) and 1-3 hours of Work-Based Learning (for a maximum of two quarter credits). These are year long courses and students may enroll for a total of eight (8) quarters. Students must be enrolled in a seminar class in order to have work release hours.

The seminar classes are designed to help students acquire knowledge and skills needed to promote personal growth and develop competencies in self-awareness and self-advocacy, career awareness, employment readiness, interpersonal relationships, independent living, and citizenship. The goals of the program are to increase student employability skills, develop vocational training and awareness, and promote student success at Eastview High School. Students apply informed decision-making processes to develop a career investigation portfolio and participate in real-world work experience through research, shadowing, and/or on-the-job training.

Courses	Prerequisite
Work Experience Seminar 1 Work-Based Learning 1 (1700 Course Numbers)	Completion of the Work Experience Application, recommendation from Counselor and permission of Work Experience Coordinator.

The second level of the Work Experience or Work Experience Transitional Seminar courses is a continuation of the first level and is designed for students in year two of the program. It also offers special support to students who may be experiencing significant personal, academic, financial, or other difficulty. Students selected for the program participate in a Work Experience Seminar or Transitional Seminar (for one quarter credit) and 1-3 hours of Work-Based Learning (for a maximum of two quarter credits). These are year-long courses and students may enroll for a total of eight (8) quarters. Students must be enrolled in a seminar class in order to have work release hours.

The seminar classes are designed to help students acquire knowledge and skills needed to promote personal growth and develop competencies in self-awareness and self-advocacy, career awareness, employment readiness, interpersonal relationships, independent living, and citizenship. The goals of the program are to increase student employability skills, develop vocational training and awareness, and promote student success at Eastview High School. Students apply informed decision-making processes to develop a career investigation portfolio and participate in real-world work experience through research, shadowing, and/or on-the-job-training.
